WEATHER OF CONCERN

Weather of Concern

- Colder temperatures are expected again this morning with widespread freezing temperatures across the northern and central valleys.
- Gusty Santa Ana winds will continue through the evening for wind prone areas in Ventura and Los Angeles Counties.

Active Weather Warnings, Watches and Advisories by County:

http://www.wrh.noaa.gov/sto/brief/wwa_bc_cal.php

WEATHER SYNOPSIS BY REGION

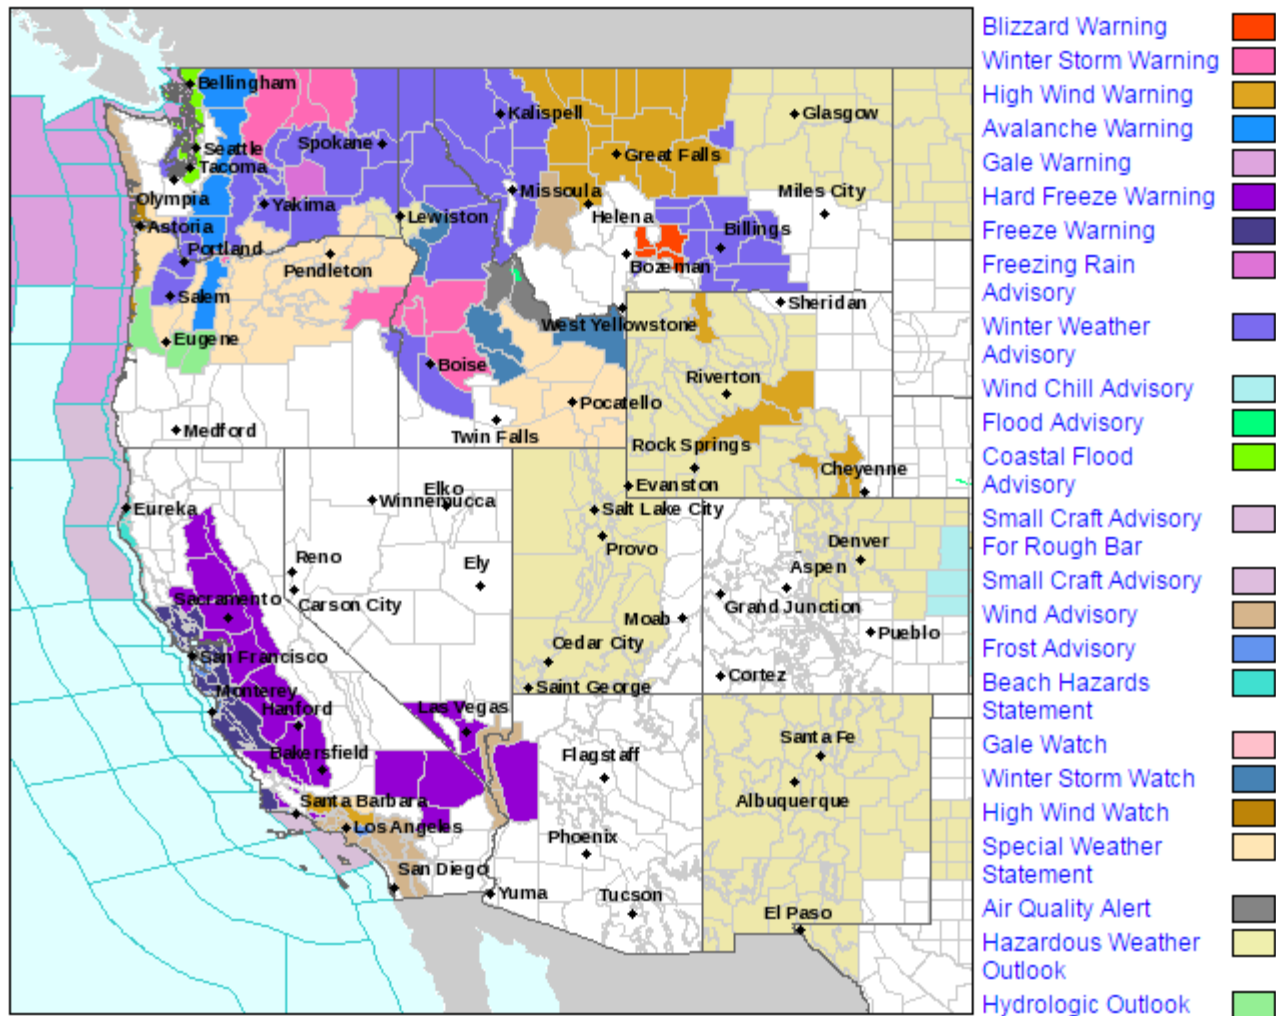

NORTHERN CALIFORNIA

There will be cool and dry weather for the most part of this week. A couple of weak systems will bring some showers to the mountains, the first on Tuesday followed by another on Thursday. Clear skies for the most part across interior Northern California early this morning with only a hint of a few high clouds approaching from the northwest. It's another chilly morning across most of the region with current readings through the valley in the upper 20s to lower 30s, and with the absence of north winds temperatures are much colder along the west side and north end of the Sacramento Valley compared to 24 hours ago. On the other hand, thermal belt influenced areas of the foothills and west slopes of the northern Sierra are quite a bit milder with the ridge moving in. While the ridge holds across Northern California today, mid and high clouds will be increasing from the north, especially north of Sacramento as a weather system moves into the Pacific Northwest.

SOUTHERN CALIFORNIA

Frost and freeze conditions are expected for many wind sheltered areas again tonight. Gusty Santa Ana winds will continue at times this week, supporting a gradual warming trend through Wednesday. A trough of low pressure approaching California late in the week may bring cooler weather and increasing clouds. A weak ridge will be over the area through midday Tuesday. It will then be replaced by a weak trough which will last through Wednesday. Good offshore flow will persist through Wednesday though it will slowly diminish through the period.
